Alternative Solution

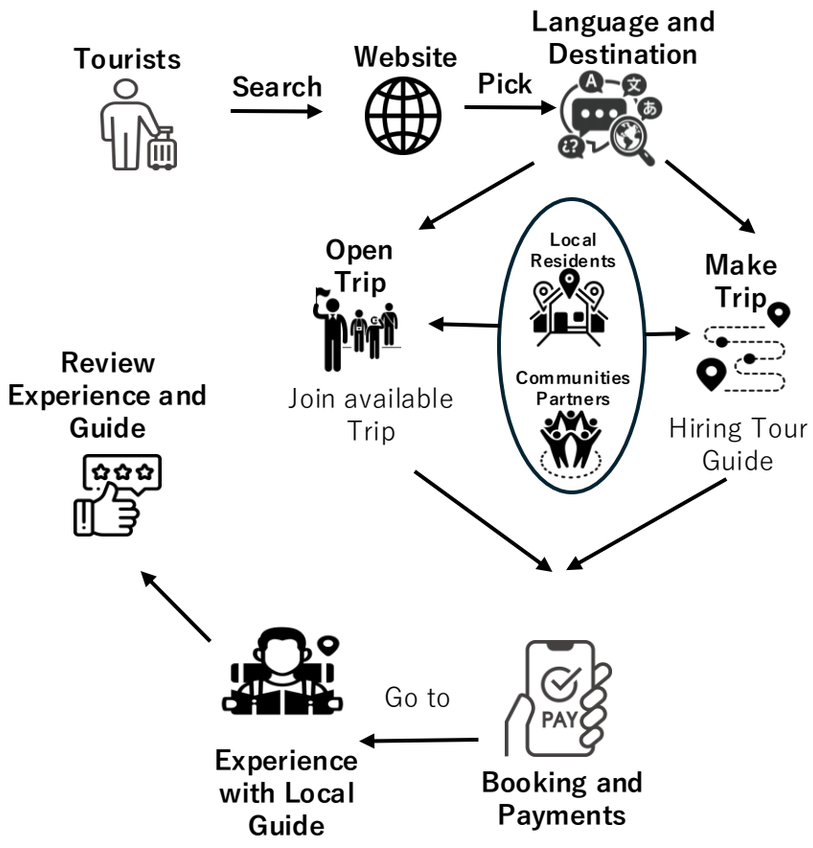

By: Group C1

1st: Open Trip Website

A system that allows local residents and foreign tourists to create and join open travel trips by sharing trip details, schedules, and participant information through an accessible digital platform at any time and from any location.

System Configuration Diagram

Benefits

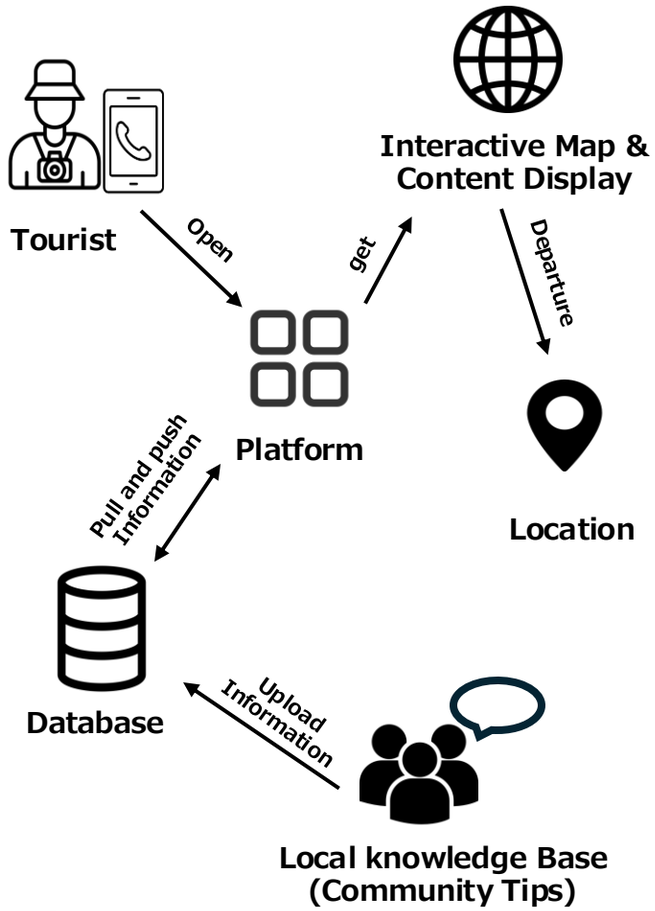

The platform enables tourists and local residents to easily create and join flexible, cost-efficient trips while fostering authentic local experiences, increasing local income, destination visibility, and more balanced tourism.

2nd: Bandung Creative Industry Information System

A digital platform that provides structured, multilingual information about Bandung's creative industry to help tourists explore independently with support from local knowledge

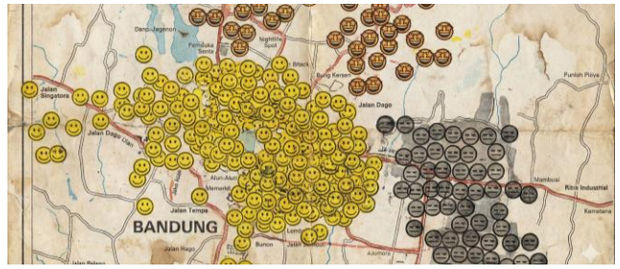

System Configuration Diagram

Benefits

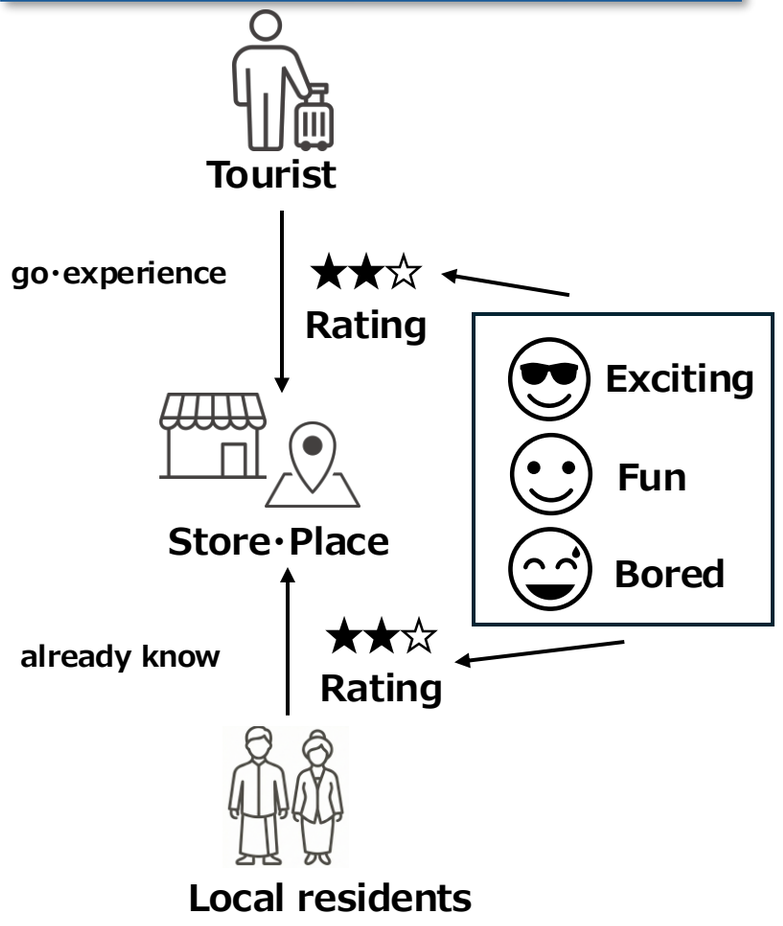

The platform help tourists to navigate Bandung's creative industries with ease by bridging the gap between tourist information and authentic local creative industries insights through a multilingual, smooth, and easy to use experience.

3rd: Evaluation information visualization service

A system that allows locals and foreign tourists to visually evaluate the places they visit by placing stamps or stickers on a map.

System Configuration Diagram

Benefits

By sharing information using simple icons, tourists and local residents can easily share places they liked or disliked with each other, overcoming language barriers.
